Introduction

In the mid-1990s the California Department of Alcohol and Drug Programs (ADP) began work on improving the state's prevention information systems. A primary goal of this effort was to develop a management information system for consistently and uniformly documenting a) levels of needs for state substance abuse prevention programming b) the nature and extent of program efforts in prevention implemented throughout the state, and c) the effectiveness of these prevention efforts in obtaining intended outcomes.

A key component of this information system was the continuous collection, monitoring, and reporting of selected community-level indicators that would serve as direct and indirect measures of alcohol and other drug use prevalence and related problems. This information system was designed to assist with statewide prevention planning and policy-making by providing useful, systematic data about prevention needs and related conditions throughout the state.

The present report is a product of this ongoing effort. It has been prepared by the Center for Applied Research Solutions (CARS)—formerly the EMT Group, Inc.—through ADP's Community Prevention Institute (CPI) training and technical assistance contract. The purpose is to provide timely, relevant information on the status of alcohol and other drug use problems in California in order to facilitate planning and monitoring of prevention outcomes at the county level. Specifically, the report may serve as a tool for planners, policy-makers, and practitioners in the field in their efforts to:

- Determine the prevalence of a problem in the community;
- Identify patterns of need for services;
- Forecast service needs;
- Establish appropriate program resource levels;
- Understand environmental influences in the community; and
- Determine whether intended social change is occurring

The report compiles data on 26 community indicators, including measures of risk factors associated with alcohol and other drug use, measures of overall substance use prevalence, and measures of the consequences associated with problem use. Each indicator and its population-based rate is reported in six-year trends with state and county-level comparisons to allow for monitoring of changes in problem status over time and across geographic area.

Introduction (continued)...

How is the information collected?

The information contained in the report was gathered from public records that are maintained and disseminated by eight major state agencies (“archival data”). This reliance on state level data sources ensures that the information reported is uniform across counties and over time (i.e., all counties use the same data collection procedures), and allows for reliable comparisons between counties and the state, and among counties with similar demographic characteristics (“like-counties”). Each agency source contributing to the report is listed in Table I.1.

Table I.1

California Department of Alcohol & Drug
Programs
California Department of Education
California Department of Health Services
California Highway Patrol
California Department of Finance
California Department of Justice
California Department of Social Services

How were the indicators selected?

The twenty-six indicators contained in the report were selected based on several key criteria, including:

- Validity: How well does the information measure what it is supposed to measure?
- Reliability: Is the data collected in a consistent manner from year-to-year?
- Availability: Is the information accessible in a timely and useable format?
- Appropriateness and relevance: Does the indicator measure risks or outcomes that have an established theoretical or empirical relationship to substance use and related problems?

As the risk and outcome information system continues to evolve and as new and more sophisticated measures become available, the set of indicators may be expanded or modified, and new selection criteria may be added.

How are the indicators organized?

The organization of the report is based on a framework of alcohol and drug abuse risk and protective factors developed by Hawkins and Catalano through their ongoing work in the prevention research field. This framework identifies four major domains of risk for substance abuse and related problems, including:

- **Community factors**, such as the availability of substances, community laws and norms favorable to use, extreme economic deprivation, high rates of transition and mobility and social disorganization;
- **Family factors**, such as family history of substance abuse, poor family management practices, parental drug use and favorable attitudes towards drug use, and family conflict;
- **School factors**, such as academic failure, low commitment to school, school-related problem behaviors;
- **Individual and peer factors**, such as peer rejection, early and persistent problem behavior, alienation and rebelliousness, friends who use drugs, favorable attitudes toward drug use, and early initiation of drug use.

In addition to the four broad domains, indicators are further classified into subdomains, which group measures that are conceptually linked within the same broad domain area. Together, these domains and subdomains provide a logical basis for organizing indicators as they relate to differing prevention strategies and outcomes.

How is the information presented?

The report is designed to serve as a simple, easy-to-use resource for understanding and interpreting community-level data on substance use in California. To facilitate its use, the document contains several basic analytic techniques to assist with data interpretation.

First, in order to make meaningful comparisons between geographic areas that differ in population size, or comparisons between differing time points, each raw indicator has been converted into a population-based rate that describes the event in relation to a standard population size, such as the number of occurrences for every 1,000 people residing in the state or in a given county. Rates are calculated as the number of events divided by the total population size, then multiplied by the population standard (e.g., 1,000). Although rates are intended to facilitate interpretation, it should be noted that in cases where an indicator measures a relatively rare event (e.g., deaths due to alcohol and drug use) rates may be unstable, or prone to wide fluctuations from year to year, particularly when applied to relatively small populations. For this reason, rates measuring rare events or rates for counties with very small population size should be interpreted with caution.

Also for comparative purposes, data is presented at both the county and state level to allow county rates to be evaluated against a relative average. Each indicator is also compared to a three-year average rate for a subset of counties that are considered to be similar in demographic characteristics to the county under consideration (see Appendix A for groupings of “like-counties”). Characteristics that contribute to the classification of “like-counties” include the relative size of the youth population, race/ethnic distribution, poverty status, and proportion of the population living in urban or rural settings.

Introduction (continued)...

For each indicator, counties are also ranked in ascending order based on an average of their three most current years of data. A low rank (e.g., 4th of 58) indicates that the county rate is low relative to other counties in the state and thus, that the population has a low relative level of substance use risk for that indicator.

Throughout the report, information is presented for three to six years of data depending on the availability of the indicator. The trend in rates over time has been analyzed using a simple correlation to determine both the direction of the trend and whether the trend is statistically meaningful (i.e., whether a true relationship exists between time in years and the value of the rate). Trends found to be significant are labeled as increasing or declining, while those that show no statistical importance are considered “undetermined”.

Collectively, these analytic tools will help translate statistical observations and data into a “real world” profile of community conditions related to alcohol and other drug use.

How is the report organized?

The body of the report is organized into two major sections. The first section presents county-level data for each of the twenty-six indicators, organized according to the four major domain areas. The second section presents state and county level comparative data, including geographic depictions of three-year average rates for all counties in California. An Appendix to the document has also been included, which provides descriptions of the eight groupings of “like-counties” derived from cluster analysis and documents the sources of archival data used in the indicator profiles, including information for web access.

Community Domain

Unemployment

Indicator 1.1

Section I:
Community
Domain

Social/
Economic
Stability

Table 1.1.1

Total Unemployed, Total Labor Force and Annual Unemployment Rate

	1997	1998	1999	2000	2001	2002

California	1.77	1.63	1.62	0.09	1.77	1.83

Source:
CA Department of Finance,
Demographic Research Unit

Data Notes & Limitations

The population growth rate measures the increase or decrease in total county population size over a one-year period; the rate does not account for differential rates of growth or decline across individual cities or communities.

Legal Foreign Immigration

Indicator 1.3

Section I:
Community
Domain

Social/
Economic
Stability

Table 1.3.1

California	6.1	5.1	4.7	6.4	8.2	8.2

Source:

CA Department of Finance,
Demographic Research Unit

Data Notes & Limitations

The legal foreign immigration rate does not include undocumented aliens, refugees seeking asylum who are waiting for approval of applications, or non-legal aliens approved for temporary residence.

The number of immigrants per county is based on intended destination of residence.

Reported Crimes

Indicator 1.4

Table 1.4.1
Reported Crimes and Rate per 1,000 Population

	1996	1997	1998	1999	2000	2001
Total Crimes	3723	3641	2866	2965	2978	2968
Total Population	74,600	76,100	76,700	77,700	80,200	81,000

Sutter	49.9	47.8	37.4	38.2	37.1	36.3
California	51.7	48.1	42.8	37.5	37.1	39.4

Source:
CA Department of Justice,
Criminal Justice Statistics Center

Data Notes & Limitations

The crime rate documents the incidence of selected offenses including homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft.

The reported crime rate tends to understate the total level of criminal victimization due to lack of detection and under reporting among crime.

Retail Liquor Licenses

Indicator 1.5

Section I:
Community
Domain

Alcohol
Availability

Table 1.5.1
Total Retail Liquor Outlets per 100,000 Total Population

California	201.7	198.5	194.7	194.6	191.6	188.7

Source:
CA Alcoholic Beverage Control (ABC)

Data Notes & Limitations

Selected retail establishments may be required to have multiple licenses (i.e., off-sale, on-sale), so that the number of liquor licenses dispensed may exceed the actual number of retail outlets.

Adult Arrests for Drug Violations

Indicator 1.6

Table 1.6.1

Adult Arrests for Drug Violations and Rate per 1,000 Population Ages 18-69

	1996	1997	1998	1999	2000	2001

CA Health and Human Services Agency,
CA Department of Alcohol and Drug Programs

Data Notes & Limitations

Admission rates do not account for the utilization of services provided outside of the publicly-funded alcohol and drug treatment and recovery system.

Admission rates are directly linked to program capacity and treatment demand, and are consequently, less useful as measures of overall prevalence of substance abuse in the general population.

Hospital Discharges for Alcohol & Drug Disorders

Indicator 1.11

Section I:

Sutter	26.2
California	26.5
County Cluster Urban "D"	31.5
Statewide Ranking	23rd

Table 1.13.3

Annual State & County Comparisons 1996-2000

	1996	1997	1998	1999*	2000*
Sutter	50.9	44.7	48.2	11.6	18.9
California	48.6	45.0	43.2	18.4	18.0

Data Notes & Limitations

Mortality rates are often subject to a high degree of variability due to the small number of events used to calculate rates. It is important to use caution when interpreting trends over time and comparisons across small geographic areas.

*Causes of death beginning in 1999 were coded using the Tenth Revision of the International Classification of Diseases (ICD-10). This revision includes an expanded number of disease classifications and changes in coding rules for mortality relative to the previous version (ICD-9), producing discontinuities in data trends. Data should be viewed with caution.

Sutter	6.3	1.4	4.7	4.1	3.5	3.4
California	6.9	1.4	5.1	4.5	4.0	3.6

Source:

CA Health & Welfare Agency,
Department of Social Services,
Statistical Services Bureau

Data Notes & Limitations

The Temporary Assistance to Needy Families (TANF) program replaces the former Aid to Families with Dependent Children (AFDC) cash assistance program. Caseload data prior to 1997 is not comparable to current figures.

The number of persons receiving TANF benefits is estimated using a one-month sample caseload; caseloads may vary from month-to-month within the reporting year.

Domestic Violence

Indicator 2.2

Table 2.2.1
**Domestic Violence Calls for Assistance and Rate per 100,000 Population
Ages 18-69 Years**

	1996	1997	1998	1999	2000	2001
Domestic Violence Calls	571	583	622	572	587	477

Table 2.2.2
**1999-2001 Comparisons
Three Year Average Rates**

Sutter	10.7
California	8.7
County Cluster Urban "D"	9.6
Statewide Ranking	45th

Table 2.2.3
**Annual State & County Comparisons
1996-2001**

	1996	1997	1998	1999	2000	2001
Sutter	11.7	11.6	12.8	11.4	11.4	9.1
California	10.4	10.0	9.2	8.5	8.9	8.8

Source:
CA Department of Justice,
Criminal Justice Statistics Center

Data Notes & Limitations

Domestic violence calls for assistance may underestimate the actual incidence of family violence due to widespread under reporting.

No adjustment is made for repeated incidents.

Child Abuse

Indicator 2.3

Section II:
Family
Domain

Family
Functioning

Table 2.3.1
**Emergency Response Dispositions per 1000
Population Under 18 Years**

California	57.2	61.8	68.2	67.6	70.1

Source:

CA Health & Welfare Agency,
Department of Social Services,
Statistical Services Bureau

Data Notes & Limitations

The number of dispositions does not include child abuse referrals where information is insufficient and cases can not be substantiated.

No adjustment is made for the repeated incidence of child abuse or neglect within a single family (i.e., multiple reports within a given year).

Children in Foster Care

Indicator 2.4

Table 2.4.1
Foster Care Placements and Rate per 1000 Population Under 18 Years

Sutter	7.2
California	9.1
County Cluster Urban "D"	10.8
Statewide Ranking	6th

Table 4.1.3

Annual State & County Comparisons 1996-2001

	1996	1997	1998	1999	2000	2001
Sutter	6.3	4.5	10.1	6.9	7.7	7.0
California	10.3	10.2	10.4	10.0	8.9	8.5

Source:

CA Department of Justice,
Criminal Justice Statistics Center

Data Notes & Limitations

No adjustment is made for repeat offenders or arrests made on new charges while an arrestee is under an out-warrant.

The nature and volume of arrests may be influenced by changes in law enforcement legislation, police manpower, and patrol procedures, limiting the comparability of data over time and across jurisdictions.

Adolescent Admissions to Alcohol and Drug Treatment

Indicator 4.2

Table 4.2.1

Adolescent Treatment Admissions and Rate per 1,000 Population Under 18 Years

	1997	1998	1999	2000	2001	2002
Treatment Admissions	0*	8*	8*	6*	1*	0*
Pop < 18 Years	22,925	23,394	23,780	23,029	23,420	23,846
Rate per 1,000	0.0	0.3	0.3	0.3	0.0	0.0

Youth Under 18 Years

Table 4.2.2
2000-2002 Comparisons
Three Year Average Rates

Sutter	0.1
California	1.8
County Cluster Urban "D"	1.3
Statewide Ranking	6th

Table 4.2.3

Annual State & County Comparisons 1997-2002

	1997	1998	1999	2000	2001	2002
Sutter	0.0	0.3	0.3	0.3	0.0	0.0
California	1.1	1.2	1.3	1.5	1.9	2.0

Source:
CA Health and Human Services Agency,
CA Department of Alcohol and Drug Programs

Data Notes & Limitations

Admission rates do not account for the utilization of services provided outside of the publicly-funded alcohol and drug treatment and recovery system.

Admission rates are directly linked to program capacity and treatment demand, and are consequently, less useful as measures of overall prevalence of substance abuse in the general population.

Juvenile Criminal Justice Involvement

Indicator 4.3

Section IV:
Individual
Domain

AOD Risk &
Consequences

Table 4.3.1

Law Enforcement Dispositions for All Offenses and Rate per 100,000 Population Ages 10-17

	1996	1997	1998	1999	2000	2001
Law Enforcement Dispositions	460	455	536	548	502	488

Sutter	11.9
California	9.3
County Cluster Urban "D"	11.9
Statewide Ranking	39th

Table 4.4.3

Annual State & County Comparisons 1997-2002

	1997	1998	1999	2000	2001	2002
Sutter	17.9	14.1	13.6	13.3	10.4	12.1
California	12.4	11.1	10.0	8.3	9.1	10.4

Source:

CA Department of Justice, Law Enforcement Information
Center, Missing and Unidentified Persons Unit (MUPS)

Data Notes & Limitations

The reported runaway rate is likely to understate actual incidence due to cases in which no missing persons report is filed with law enforcement agencies; no adjustment is made for habitual runaways.

Births to Teen Mothers

Indicator 4.5

Section IV:
Individual
Domain

AOD Risk &
Consequences

Table 4.5.1

**Births to Teen and Rate per 1000 Female
Population Ages 15-19**

	1997	1998	1999	2000	2001	2002
Teen Births	145	157	120	139	151	165

Reported Runaways per 1,000 Youth Under Age 18

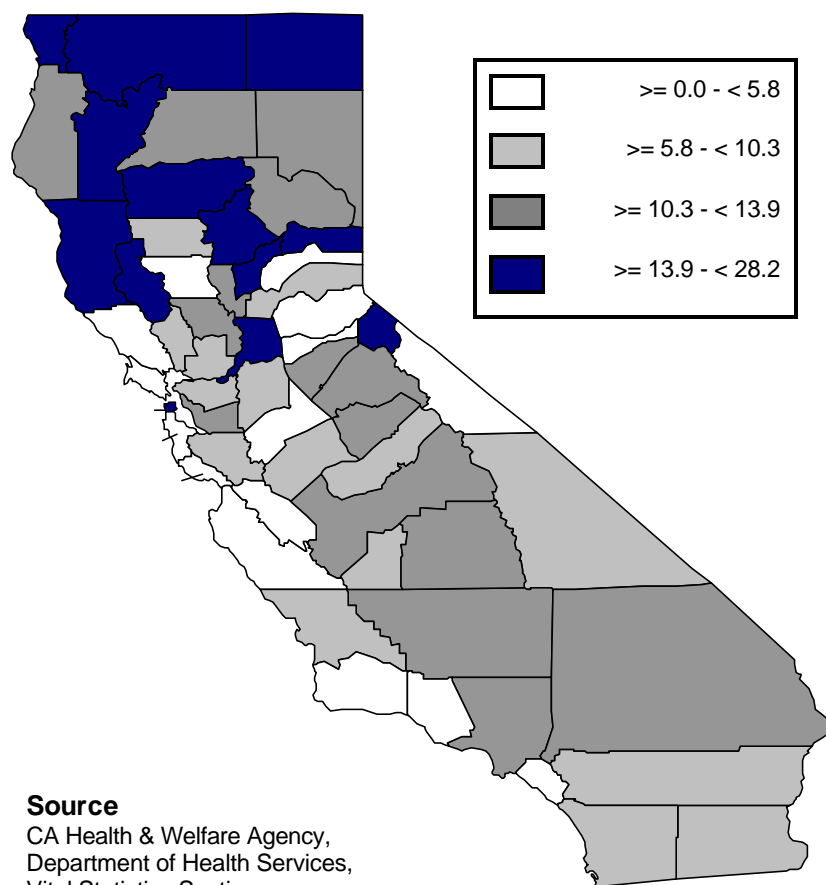

Individual/Peer Domain

Indicator 4.5

Births to Teens per 1,000 Female Population Ages 15-19

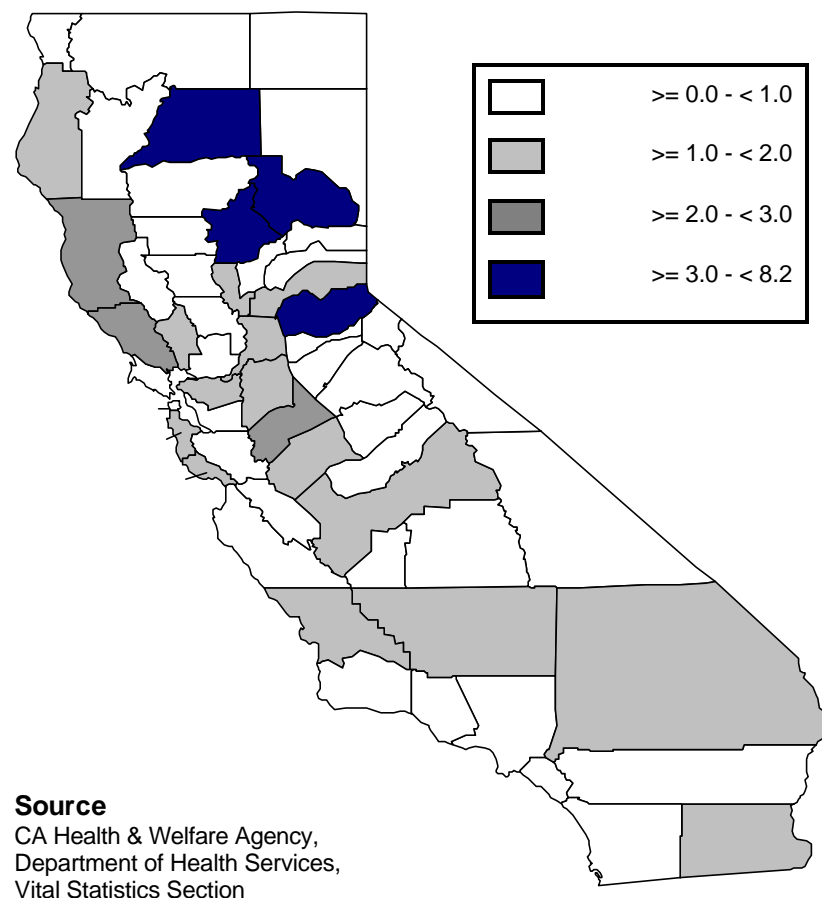

Individual/Peer Domain

Indicator 4.6

Adolescent Suicides per 1,000 Population Under Age 18

Individual/Peer Domain

APPENDICES

Appendix A

Listing of County Clusters and Description of Demographic Characteristics

Cluster		Description
Urban “A”		
Fresno Imperial Kings Los Angeles	Merced Monterey Tulare	Largely urban, with small (1%) to moderate (31%) rural populations; above average poverty levels; race/ethnically diverse with prominent Hispanic populations approaching or exceeding a majority in several counties; low educational attainment among residents of most counties (noted exceptions are Los Angeles and Monterey counties); youth populations account for above average percentage of total county population
Urban “B”		
Alameda Contra Costa Orange Sacramento San Diego San Francisco	San Mateo Santa Clara Solano Ventura Yolo	Predominantly urban, with zero to eleven percent of total populations living in rural areas; low or average rates of poverty; race/ethnically diverse with largest Black and Asian populations; highest educational attainment on average across county subgroups; youth account for lower than average proportion of total population
Urban “C”		
Butte Marin Napa Placer	San Luis Obispo Santa Cruz Sonoma	Largely urban, with small (7%) to moderate (34%) rural populations; lower than average poverty (excluding Butte county); predominantly White, with small (9%) to moderate (26.8%) Hispanic populations and smaller than average Black, Asian, and Native American populations; youth account for lower than average proportion of total population.
Urban “D”		
Kern Riverside San Bernardino San Joaquin	Santa Barbara Stanislaus Sutter Yuba	Largely urban, with small (6%) to moderate (28%) rural populations; average to above average poverty rates; race/ethnically diverse with moderate to large Hispanic populations and larger than average Black and Asian populations; low levels of educational attainment among county residents (excluding Santa Barbara county); youth populations account for above average percentage of total county population.
Rural “E”		
Colusa Glenn	Madera San Benito	Largely rural, with 48 to 72 percent of the population living outside of urban areas; higher than average poverty rates (excluding San Benito); predominantly White (50.8%) and Hispanic (42.1%), with Blacks, Asians, and Native Americans accounting for less than five percent of the total population; very low levels of educational attainment; youth populations account for above average percentage of total county population.
Rural “F”		
El Dorado Humboldt Inyo	Mono Shasta Trinity	Largely rural, with 45 to 72 percent of the population living outside of urban areas; low to above average poverty rates; lower than average levels of educational attainment among most counties; predominantly White (81.7%) with small minority Hispanic (9.3%) and Native American (4.1%) populations; Blacks and Asians account for less than two percent of the total population across counties.
Rural “G”		
Amador Del Norte Lake Lassen Mendocino	Modoc Nevada Siskiyou Tehama Tuolumne	Comparable demographic composition to Subgroup 6 with proportionately larger rural populations
Rural “H”		
Alpine Calaveras Mariposa	Plumas Sierra	Predominantly rural, with 70 to 100 percent of population living outside of urban areas; race/ethnically homogenous, with small minority Hispanic (7%) and Native American populations (4.8%); Blacks and Asians together account for one percent of the total population; lower than average educational attainment among county residents.
